

Effects of intentionally treated water on the growth of mesenchymal stem cells (MSCs):

An exploratory study **Grant #68/18**

Yung-Jong Shiah, National Kaohsiung Normal University, Taiwan

Claimed fact: Blessing travels. Intention is nonlocal and trans-living systems.

Questions: Blessing effects? This is mind and matter interaction (MMI), involving psychokinesis and existence of God (s). Is MMI and existence of God (s) real?

Theory: The Cryochrome (CRY) Theory (Shiah, 2012), a flavoprotein present in all living systems, may be a “transducer” of MMI because of its quantum biological properties.

Experiments and Results: The results indicate MSCs with intentionally treated vs. untreated water showed significant differences in the growth.
